Proposed Solution

ComicCraft is a web-based AI comic story creator. The user enters a story prompt, main character name, setting, story tone and art style. FastAPI coordinates Gemini Flash for the structured five-panel outline, Gemini Pro for narration and dialogue, Stable Diffusion for comic-style images, a layout builder for panel organization, and FPDF for PDF export.

Core flow

User → Input Form → FastAPI → Gemini Flash → Gemini Pro → Stable Diffusion → Layout Builder → Comic Preview → PDF Export

Existing screenshots from the ComicCraft documentation are included in the submission package to preserve the project's real interface and output evidence.
